Dear Sir:

In response to the Office Action mailed January 27, 2003, please amend the above-captioned patent application as follows:

IN THE CLAIMS:

Please amend Claims 1, 7 and 12 as follows:

1. (AMENDED) An accommodating intraocular lens for implantation in an eye having an optical axis, said lens comprising:

an anterior portion comprised of a viewing element, said anterior viewing element comprised of an optic having a refractive portion with a refractive power of less than 55 diopters;

a posterior portion comprised of a viewing element;

said lens having an optical axis which is adapted to be substantially coincident with the optical axis of the eye upon implantation of said lens;
